Dear Dr. Gottlieb

AllTrials recently wrote to you about the launch of the FDAAA TrialsTracker, developed by the EBM Datalab at the University of Oxford. This publicly accessible website checks compliance with the results reporting requirements of the FDAAA 2007 and HHS regulations 42 CFR Part 11 (the Final Rule). It then displays all the individual trials that have breached. We said that we would write to you every week with a list of the trials that have breached their reporting requirements, and a rolling total of the fines that these trials should incur.

The tracker has been live at <https://fdaaa.trialstracker.net/> for 24 weeks. As of 12pm GMT today, 1172 trials on ClinicalTrials.gov are assessed as due to report results. 682 of those have reported results. That is a reporting rate of 58.2%. The potential fines the FDA could have collected is now estimated at \$389,829,024. 490 trials have not reported results. Those trials are listed below.
